

INCREASE YOUR REVENUE WORK WITH AN INDUSTRY LEADER

STEELE SOLUTIONS EXPERIENCE

Steele Solutions' success is built on our knowledge to design, manufacture, and install engineered steel systems. We offer technical engineering innovation, superior product integrity, manufacturing expertise, and an unparalleled commitment to customer service.

Steele Solutions is committed to exceptional care of our dealers.

- Listening and responding in a timely manner
- Fast quote turnaround, concept drawing available
- Best, competitively priced solution
- Sales training and educational resources
- Understand our customers' needs and applications
- Superior project management
 - Communicate project status
 - Commitment to project schedules and deadlines
- Flexible, creative design solutions for:

• Product storage	• Office space
• Manufacturing space	• Warehouse
• Automotive parts storage	• Record and archive storage
• Processing	• Overstock storage
• Work platforms	• Lunchrooms

COMPANY OVERVIEW

Steele Solutions, Inc. is a preferred designer and manufacturer of engineered steel structures, including **mezzanines, work platforms, equipment platforms, towers, catwalks and crossover bridges** for material handling, storage, conveyor, equipment and machinery support, and other industrial and commercial uses. Distributors trust Steele Solutions as a partner and valued resource and share our passion for top quality products.

Formed in 1996, by three longtime industry experts, Steele Solutions has grown considerably since then, gaining clients in all 50 states and throughout the world. As a privately-owned company our owners are active in the business, being involved at some level on every project. We have multiple facilities and 300,000 square feet of manufacturing, design and office space in metropolitan Milwaukee.

VALUE ENGINEERING

Engineering knowledge and leadership.

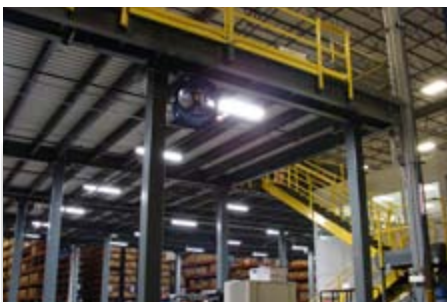

- Design leadership capabilities
- Professional Engineers (PE) on staff
- PE Stamped drawings
 - All 50 states & Canada
- In house drafting team
- Unique design solutions
 - Approved seismic designs
 - Most designs without bracing
 - Code experts, design in accordance with:
 - IBC, OSHA, CISC standards
 - Faster, easier for building permitting
- Moment Connection
 - Structurally sound
 - Reduces/eliminates overturn

SUPERIOR QUALITY

Integrity. Our People. Our Products.

- Advanced manufacturing technology
- Automated powder paint lines
- Robotic plasma cutting system
- Robotic welding
- CNC drill presses
- Leading edge manufacturing capabilities
 - AWS certified welders
 - Canadian Welding Bureau (CWB) certified
 - City of Los Angeles licensed fabricator
- Follow ISO compliant procedures
- Packaging meets IPPC global standards
- Nut & bolt construction (ASTM A325 bolts)
- All component pieces marked for easy installation
- Lifetime warranty

"Steele Solutions marks every piece so the entire structure goes together quickly and easily. The nut and bolt design is simple and makes installation easy. Great design and easy installation!" — Steele Solutions Installer

"Design capabilities and quality products are why we work with Steele Solutions. Steele Solutions' creativity and flexibility in designing to the existing facility footprint adds value to us and our customers." — Steele Solutions Dealer
