

What's New at Steele Solutions?

See how our turnkey solutions and expanded capacity support your success

SteeleTrax: Versatile Framing for Dynamic Operations

SteeleTrax is an innovative structural steel framing member designed to optimize vertical space and streamline installation in warehouse and distribution center operations.

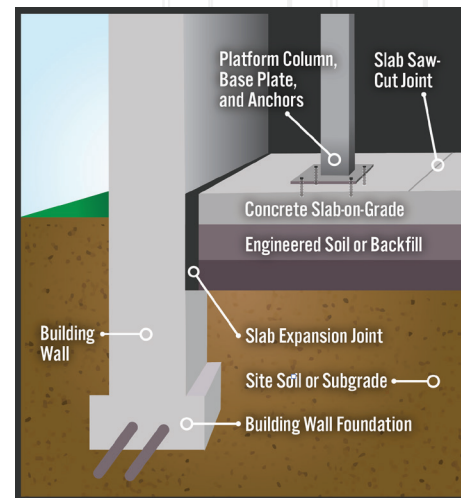

Designed for versatility and efficiency, SteeleTrax makes suspending equipment—like pocket sorter conveyors, fire suppression systems, lighting, and conduit—seamless and cost-effective.

Framing Member Specifications

- Available Profile Depths: 8 - 18"
- Available Thicknesses: 14-gauge – 1/4"
- Max Member Length: 20'

Slab Analysis Services: Starting Projects On Solid Ground

Steele Solutions provides turnkey slab analysis services for industrial and material handling facilities. Whether evaluating new building concrete capacity requirements or recommending reinforcements and modifications for existing concrete floors, we ensure your concrete slab is equipped to safely and efficiently support your high-concentration loads.

AISC Certified

Did you know? Steele Solutions' Rawson and Waupaca plants hold American Institute of Steel Construction (AISC) Certification, reinforcing our commitment to the highest standards in structural steel fabrication. AISC certification ensures our manufacturing processes meet rigorous quality, safety, and performance requirements. We're committed to delivering stronger, safer solutions—because your projects deserve the best.

MiTek: Strategic Acquisition to Expand Capacity

Steele Solutions is proud to announce our acquisition of MiTek Mezzanine's North American business. This strategic move brings MiTek's Waupaca manufacturing facility and New Berlin team into the Steele Solutions family, expanding our capabilities alongside our existing facilities in South Milwaukee, Wis., and Tiffin, Ohio. The integration strengthens our ability to deliver innovative structural steel platforms and material handling solutions across North America.

New! Solutions Catalog

Explore our latest solutions catalog to see how our innovative products and services can optimize your operations. As one of North America's leading manufacturers of structural steel equipment, chutes, and lockers, we provide consultation, design engineering, fabrication, and delivery.

Bring us your most complex problems and we'll work with you to understand your needs to develop a product solution that helps you improve effectiveness and efficiency no matter the application.
